Security are on site between 5pm and 7am Monday to Friday and 24 hours Saturday, Sunday and Bank Holidays. Please make a note of these telephone numbers.

Briggs & Forrester

04 Park Square: 07950 028755

On 12 March 2015 Briggs & Forrester Northern region held our first annual clay pigeon shoot. Clients and consultants were invited to spend the day shooting clays with our Chairman, directors and senior management team to establish and grow relationships within the industry.

At the event we held a raffle to raise money for Breast Cancer Care. The raffle which had a generous selection of prizes donated from our supply chain raised £1,025 for the charity.

SLR Consulting

2 Newton Business Centre: 2455153

SLR is an independent and employee-controlled international environmental consultancy that has an unrivalled reputation for providing high quality tailored services. We are a dynamic, responsive and fast growing company with an expanding network of offices in Europe, North America, Asia-Pacific and Africa.

SLR provides multi-disciplinary advice from in-house experts on a wide range of strategic and site specific environmental and sustainability issues. In particular, we specialise in providing strategic advice to both public and private sectors clients and have a broad base of blue chip customers in the following sections; Industry, Infrastructure, Mining & Minerals, Planning & Development, Oil & Gas, Renewable & Resource Efficiency.

DK Model and Casting

04 Park Square: 2573480

DK Model and Casting would like to welcome our new model booker, Chloe, who will be with the agency until September on placement.

Chloe is studying Marketing at Sheffield Hallam University and she is very excited to join the team and gain new skills and experience in the workplace.

DK are very happy to have Chloe on board and look forward to working with her!

TR Engineering

7 Chambers Way: 2572500

New Greenflame Biomass system supports Trianco Factory

The latest biomass heating system from Trianco has previewed right outside its manufacturing facility at Thorncliffe Park.

Newly installed outside the premises at Trianco and now supplying ample heating and hot water to the offices and factory, ECO External is the ideal biomass system for those who require optimum space. It is designed to work efficiently and effectively outside of a property with efficiencies exceeding 91%.

ECO externals range in outputs from 10kW – 60kW and feature the latest innovations in biomass technology including the new 'Igneo Slim' controller and remote monitoring service allowing the homeowner to monitor and control their heating system in a similar way to a gas or oil boiler. Other features include Lambda control to ensure optimum efficiency and two large hopper store capacity options to save on re-filling time.

Finished in a tough Black Graphite weatherproof casing, ECO is supplied finished complete with a comprehensive ECO system flue kit to assist a smooth and easy install.

Greenflame ECO boilers are fully approved and applicable for the government, Renewable Heat Incentive. (RHI).

Things you would love to say out loud at work

Do I look like a people person?

I started out with nothing and still have most of it left

Sarcasm is just one more service we offer
Errors have been made. Others will be blamed

Nice perfume....Must you marinate in it?
Chaos, panic and disorder – my work here is done!

I thought I wanted a career, turns out I just wanted a salary.

Oh I get it....like humour, but different.
AhhhI see, the know-it-all-fairy has visited us again.

OCF

5 Rotunda Business Centre: 2572200

OCF wins two awards at 2015 Northern Technology Awards

We are delighted to be recognised as one of the fastest growing technology companies in the North, scooping two awards at the 2015 Northern Technology Awards, in the categories of Fastest Growing Company and Fastest Growing Larger Company.

One of our recent computing installations at the University of Oxford was completed in April. The system is supporting research across all four Divisions at the University; Mathematical Physical and Life Sciences, Medical Sciences; Social Sciences and Humanities and will support a broad range of research projects across the University.

To mark the occasion, the University held a launch event to promote the computing facilities available for the researchers which included closing the road outside the e-Research Centre for the Bloodhound Supersonic Car to be parked outside (pictured). The Bloodhound SSC project is being designed to break the land speed record by travelling over 1,000 mph! This demonstrates the type of projects that use supercomputers as part of their product development as well as aims to encourage young people to become more involved in science, technology, engineering and maths subjects.

TWA Lean Consulting Ltd

6b Hall Annex: 2573485

Why? Why? Why? – That was me 10 months ago, questioning why business couldn't sustain the improvement gains made. Today I am doing it for myself!

TWA Lean Consulting was set up to work with all industry sectors to provide Leadership, Operation Excellence, Process Improvement and Lean Six sigma training to everyone engaged in making good change stick. That first step, started me on a journey from saying "I'm gunna do that" to "just do it"!! I challenge you to look around your business and ask why? Transformation can even be fun, just look at the evidence.....
